

$$(659) \text{ d) } 1\frac{1}{5} - x = \frac{2}{3} \quad | +x$$

$$1\frac{1}{5} = \frac{2}{3} + x \quad | -\frac{2}{3}$$

$$1\frac{1}{5} - \frac{2}{3} = x$$

$$\frac{6}{5} - \frac{2}{3} = x$$

$$\frac{18}{15} - \frac{10}{15} = x$$

$$\frac{8}{15} = x$$

$$(660) \text{ a) } \underline{\underline{x = 91}}$$

$$\text{b) } \underline{\underline{x = 3,64}}$$

$$\text{c) } \underline{\underline{x = \frac{5}{12}}}$$

$$\text{d) } \underline{\underline{x = \frac{13}{30}}}$$

$$(665) \text{ c) }$$

$$(663) \text{ a) } x - 19 = 8 \cdot 3$$

⋮

$$\underline{\underline{x = 43}}$$

$$\text{b) } 37 - x = 3 - 12$$

⋮

$$\underline{\underline{x = 1}}$$

$$\text{c) } x + (x+1) + (x+2) = 60$$

$$x + x + 1 + x + 2 = 60$$

$$\text{1zahl } \underline{\underline{x = 19}}$$

$$\text{2z.: } \underline{\underline{x+1 = 20}} \quad \text{3z.: } \underline{\underline{x+2 = 21}}$$

$$\text{d) } x : 7 = 3,9 \quad | \cdot 7$$

$$\underline{\underline{x = 27,3}}$$

ÜS 63-67 findest du die Lösungen hinten im Buch.

Liebe Grüße

Martina Klüger
